Summary

I'm a full-stack developer originally from Brazil, living and working in São Paulo. I also ♥ developing crazy ideas while studying new web technologies.

If I had to bet on the next platform, it would certainly be the web. That's why I specialized on the topics below:

- HTML Semantics, SEO (it's still important), Web Components, CSS and SASS;
- A lot of Javascript, like: Vanilla (that's the basics of everything!), Progressive Web Apps (SW), Node.js, automation tasks (like Gulp);
- MySQL, NoSQL, PHP and of course WordPress;
- Server and Cloud such as Apache, Nginx, Google App Engine and performance optimizations;
- Mobile-first technologies like AMP, Firebase, gestures and interface motions.

Experience

Developer at Mainroute – DOMVS (april 2016 — present)

WordPress, Front-end and Server migration at Editora Abril. - <http://www.mainroute.com.br>

Developer at LOV – Dentsu (october 2014 — april 2016)

WordPress, E-commerce and Management Systems (Social, Content). - <http://www.lov.com.br>

Developer at Elo Digital (april 2013 — october 2014)

E-commerce, WordPress, SEO and Mobile. - <http://www.elodigital.cc>

Developer at Coworkers (january 2013 — april 2013)

Facebook apps and WordPress. - <http://www.coworkers.com.br>

Developer at GTA Multimídia (january 2012 — january 2013)

PHP, HTML, CSS, JavaScript, SEO. - <http://www.gtamultimedia.com.br>

Education

High School (2009 - 2011)

Colégio Cenecista Catanduvas - Varginha, MG - Brazil

Projects that I've work with

Editora Abril (june 2016 — present)

Part of the team responsible for developing the new mobile-first CMS for Editora Abril brands, using WordPress VIP, AMP and social tools.

URL: <https://veja.com.br>

Livraria Cultura (june 2014)

Front-end for the Livraria Cultura store, developed in Bootstrap.

URL: <http://livrariacultura.com.br>

Cartão Elo (august 2015)

Institutional website for the ELO credit card brand.

URL: <https://elo.com.br>

Personal Projects

Zuck.js (april 2017 — present)

Vanilla Javascript project that aims to provide stories to any web page, similar to Instagram Stories. The main goal was to build a small and robust media viewer component without any other dependency.

URL: <https://ramon.codes/projects/zuck.js>

GGReader (april 2013 — november 2014)

A CSS project that applies the Google Reader design on Feedly web app. Designed for people who miss Google Reader, it reached 30k downloads on Chrome Store until the project was discontinued.

URL: <http://ramon.codes/projects/ggreader.crx>

Jump (april 2009 — present)

A super secret social network project where I apply all the things that I learn overtime.

URL: <https://jump.social>
